Seeking a Drupal focused development position to build websites and apply my skills and expertise

Employers

Cognizant/Estée Lauder Companies Online (2015 – present)

Deployment, integrations, and core application support on a massive 24/7 global scale, with a focus on compliance with stringent e-commerce security protocols

Creating advanced applications and tools focused around Drupal including custom drush commands, JWT auth, REST API creation and advanced Akamai cache management

Engineering web tools and services in a completely agile environment, collaborating in sprints with JIRA ticketing, creating pull requests and reviewing code

Delivering code entirely from the terminal including creating bash and PHP scripts, fluency in command line git, SQL and Vim text editor.

Inventive Health – Snr. Interactive Producer/Tech Lead (2012 – 2015)

Spearheading the creation of responsive CMS driven web applications from SQL to JS

Maintaining a standard of excellence for ease of editing and code reusability on both the client side and the server side

Collaborating with other developers and content editors to divide tasks efficiently and bring application code, markup, style sheets and content together quickly and concurrently

Digging deep into Drupal to create custom modules with both core and contributed APIs including commerce, form, batch, rules, views and entity.

Training front-end themers to leverage responsive templates built on HTML5, SASS, CSS3PIE, Modernizer, Susy Grids and jQuery

Engaging in LAMP server administration, setup and scripting including Ubuntu, Apache, SQL, SSH, Subversion and Drush.

MRM World Wide – Snr. Web Developer (2010 – 2012)

Created client side apps, games, forms and menus leveraging HTML5, CSS3, JS, Canvas, jQuery and many popular APIs including Google Maps, Flickr, Facebook and Twitter

Architected Drupal sites and managing major site transitions and feature additions for Educational Testing Service (GRE, TOEFL) including custom modules and themes

Integral in Adobe CQ server side development and theming efforts including custom component creation, AJAX forms, and data/asset management

Collaborated with .net architect to develop “Site Core site of the year “ nominated applebees.com in under three months

Vital in the planning stages, providing estimates, evaluating feasibility and presenting requirements to creative/UX and account

Managed front-end contractors in their day to day business (debugging, problem solving, SVN/Ticketing/server access, direction)

LexisNexis – Web Developer (2008 – 2010)

Created hundreds of complex layouts in a high turnaround environment, focused on quality and speed

Leveraged my advanced knowledge of HTML/CSS to create highly stylized and dynamic websites optimized for all browsers

Worked closely with designers, copywriters and project managers to deliver websites to demanding clients

Helped to establish internal standards for code quality and efficiency

Integrated new sites into the Site9 content management system and while continuing to support to existing sites and users

Ramapo College of New Jersey - Web Team Leader (2005 - 2008)

Produced and validated XHTML and CSS to meet the highest standards of compatibility and render smoothly in all browsers and operating systems with an emphasis on usability and accessibility

Established procedures and guidelines for the future using global style sheets and templates

Researched, planned and developed sites in a collaborative environment

Created wireframes, sites maps and other UX documents

Instructed, advised and supported fellow team members and other staff in maintaining and up-dating the site and using the Ektron CMS400.net content management system

Evaluated Web Trends reports and Google Analytics data to improve current sites and plan for the future
